

TECHNICAL SHEET

MOBILE SURVEILLANCE UNIT MINI

**Complete, compact
and cost-efficient**

An outstanding option for comprehensive security at a modest cost, the MSU Mini loads sophisticated surveillance technology into a small package, ready to mount on just about any available wall or pole.

Mini, but mighty

With its two cameras, 24/7 video recording, and live-stream access for remote monitoring, the MSU Mini asserts an intimidating security presence that can complement or replace physical guard services.

The Mini is deliberately designed for flexibility, built to accommodate your choice of camera mix – traditional video or motion detection – plus options for additional cameras to meet your security program needs.

Key benefits at a glance

- Communicates securely with remote GardaWorld Monitoring station via LTE cellular signal and local 24/7 recording
- An autonomous system providing ample coverage when your site is closed
- Can accommodate up to four cameras for broad and multi-directional observation
- Robust design resists tampering, remains resilient in even the most extreme hot or cold temperatures
- Lease options provide financial flexibility

Features & options for even greater value

- Camera options include high-definition video and motion detection
- Remote connectivity is fulfilled independently of your IT systems, eliminating the expense and hassle of in-house IT oversight
